Education

LDRP Institute of Technology & Research

Bachelor of Engineering – Computer Engineering

2019 – 2023

Gandhinagar, Gujarat

Technical Skills

Frontend: HTML , CSS , Javascript , Typescript , React JS , Next JS , Redux ,Zustand, Material UI , Tailwind , Jest

Backend: Node JS , Express JS , Sequelize

Database: Mongo db , PostgreSQL

Code Versioning Tools: Github , Bitbucket , Gitlab

Project Management Tools: JIRA

Experience

Tatvasoft

Software Engineer

Jan 2023 – Sep 2025

Ahmedabad, India

- Worked on modern web applications using React.js, Next.js, Redux, Tailwind CSS, Material UI, and Node.js.
- Built scalable backend services with Express.js and PostgreSQL, using Sequelize ORM.
- Integrated and consumed RESTful APIs efficiently and wrote unit tests using Jest and React Testing Library.
- Collaborated in agile teams using JIRA, Bitbucket, and GitHub for sprint planning, version control, and task tracking.
- Took ownership of end-to-end feature delivery, bug fixing, and performance optimization.

Vivansh Infotech

Software Engineer

Oct 2025 – Present

Ahmedabad, India

- Developed and maintained enterprise web applications using React.js, Zustand , Next.js, Tailwind CSS, and Material UI.
- Integrated REST APIs, implemented CRUD operations, and managed application state efficiently using Redux to deliver responsive user experiences.
- Collaborated with cross-functional teams in an Agile environment, participated in code reviews, and used Git, Azure Devops, and JIRA for version control and sprint management.

Projects

Charge Point Operator :

A web application for managing EV charging stations, ensuring real-time access, maintenance, and third-party integrations.

- Developed multiple frontend modules like station management, user access, and invoicing.
- Implemented CRUD operations with efficient state management using Redux.
- Wrote unit/UI test cases using Jest and React Testing Library for better reliability.
- Followed component-based architecture for scalable UI and ensured code quality through reviews.

Co-Workspace Management:

A web application for managing co-working spaces, enabling workspace operations, resource allocation, bookings, invoicing, and tenant management through dedicated operator and member portals.

- Developed multiple frontend modules for operator and member portals, including dashboard, calendar, location management, tenant management, order processing, invoicing, and customer service tickets.
- Built booking and resource management features to efficiently handle workspace reservations, room allocation, and resource availability across multiple locations.
- Integrated Developed member portal functionalities including workspace management, booking timeline, and member details, while integrating REST APIs, implementing CRUD operations, and managing application state efficiently using Zustand.
